

Youssef Ashraf Abdelhalim Abdelaziz

Phone: +49 178 8026239 | Email: youssef.abdelaziz@tha.de

Motivated Information Systems student with an international academic background in Computer Science (Egypt) and Information Systems (Germany). Strong foundation in software development, data engineering, and web technologies, with hands-on experience in C++, Java, Python, and SQL. Practical experience in designing data-driven solutions using Microsoft Fabric, with a strong interest in data analytics, software engineering, and scalable digital systems. Multilingual communicator with a solid academic track record and a strong motivation to contribute to real-world IT and data projects.

Key Skills

Programming: C++, Java, Python, HTML, CSS, JavaScript, SQL
Data Analytics & Visualization (Power BI, Excel and Fabric)
Microsoft Certified: DP-600 Fabric Analytics Engineer Associate
Operating Systems & Computer Networks
Web Development & Software Engineering
Business Administration & Marketing Basics
Languages: **Arabic** (Native), **English** (B2), **German** (A2)

Education

Technische Hochschule Augsburg, Germany

B.Sc. International Information Systems – 4th Semester
2024 – Present

Faculty of Computer Science & Informatics, Egypt

Undergraduate Studies (2 years completed, transferred to Germany)
2022 – 2024

Certifications

Microsoft Certified: DP-600 – Fabric Analytics Engineer Associate (2025)
Microsoft Certified: DP-700 – Fabric Data Engineer Associate (2026)
IELTS B2 (English Language Certificate)

Projects

Line Follower Car (C++ & Arduino) – Designed and programmed a robot car to follow a line using C++ and Arduino microcontrollers.

Bill Management System (Python) – Developed a system to automate billing operations, improving record-keeping and data handling.

Microsoft Fabric Data Platform Implementation – Sortimo Project

Company: DIVINT Technology und IT Solutions GmbH

Role: Working Student – Data Engineer

Technologies: Microsoft Fabric, SAP HANA, SQL, PySpark, Data Pipelines, Medallion Architecture

- Designed and implemented an end-to-end data ingestion pipeline from **SAP HANA** to **Microsoft Fabric** using Data Pipelines.
- Built and managed a **Medallion Architecture (Bronze, Silver, Gold)** to ensure scalable and structured data transformation.
- Performed data cleaning, transformation, and optimization using **SQL and PySpark** within Fabric Lakehouse.
- Developed structured gold layer datasets optimized for analytics and reporting.
- Created a chatbot using **Microsoft Copilot Studio (formerly Power Virtual Agents)** with Fabric data to allow business users to retrieve company insights dynamically.
- Significantly improved data accessibility and enabled self-service analytics for business stakeholders.

Microsoft Intune Device & Application Management Project

Company: DIVINT Technology und IT Solutions GmbH

Role: Working Student – Data Engineer

Technologies: Microsoft Intune, Microsoft Endpoint Manager, Windows Devices, Application Deployment

- Supported a Microsoft Intune project focused on managing company devices and deploying business applications.
- Deployed multiple software applications to company-owned Windows devices through Microsoft Intune.
- Added and removed devices from the organization's device management environment based on business needs.
- Gained hands-on experience in endpoint management, centralized application deployment, and IT administration.

EasyFit - AI-Powered Nutrition & Calorie Tracking App

Company: Augsburg THA

Role: Student

Technologies: Flutter, Firebase, OpenAI API, REST API, Backend Integration

- Developed and integrated AI-powered functionality for a mobile nutrition and calorie tracking application.
- Worked with Firebase backend services to support data handling and application functionality.
- Integrated the OpenAI API into the Flutter application to enable intelligent meal analysis and nutrition-related responses.
- Connected Flutter, Firebase, and OpenAI API logic to ensure smooth communication between the mobile app, backend, and AI service.
- Currently continuing development by adding new features and improving the application.

Work Experience

DIVINT Technology und IT Solutions GmbH -Current

Data Engineer (Work Student)

2025-Current

Clean & Safe Company, Germany-Current

Logistics Assistant |2025-Current

Supported daily operations ensuring workplace safety and cleanliness.

Developed organizational and teamwork skills.
